

Torana 6

GTR

Discover the ultimate
in driving pleasure

High performance '2850' cc 6-cylinder develops 130 hp, 160 lbs./ft. torque.

Short, fast, 4-on-the-floor gearshift designed for quick, positive changes.

Tacho, speedo, oil pressure, water temperature, ammeter and fuel gauges.

What happens when you take a lean, lithe road machine, drop in a muscular 2850 cc. Holden 'six' that produces 130 hp from twin-barrel carburetion, tie it to an all-synchro floor mounted 4-speed, add dual exhaust manifolds and a low impedance air cleaner . . . and set it all on wide rally wheels and B70 boots? You'll find out when you drive a Torana GTR—if you can stop staring admiringly at it long enough to get behind the wheel.

To complete your command of the road are power assisted front disc brakes. 16.5:1 ratio rack-and-pinion steering. Front stabilizer bar. Extra wide 5.50 JJ x 13 rally wheels with double safety rims. Wide B70 red-band high speed tyres. And in the comfort department, deep-pile carpet. High back deep foam bucket seats with optional black/white or black/orange houndstooth trim. Fan-boosted heating/demisting.

Torana GTR. A mover all the way.
